ODDORITHM · FREE CARD

Deal check for sale week

Before you buy from a shop you don't know — including one an AI finds for you.

1 · WHO IS THE SHOP?

Search its name and its web address with "scam" or "complaint" — on a search engine, not the shop's own site. A site that is days old is a warning.

2 · WHAT DO REVIEWS SAY?

Read them away from the shop's own page. Five stars all posted on one day is a sign, not a comfort.

3 · HOW DOES IT TAKE YOUR MONEY?

Pay by card with protection. A seller who demands gift-card codes, wire or crypto as the only payment is probably a scam.

Never send gift-card codes to pay a seller.

Gift cards are for gifts. Only scammers demand the codes as payment.

Checks reduce risk — they can't guarantee a seller is safe. A big discount or a countdown alone is not proof of a scam; real sales happen. If an AI finds your deals, the same three checks apply.

Scammed, or a shop demanded codes? ReportFraud.ftc.gov · ic3.gov
